WORK EXPERIENCE

Discovery Genie

Front-End Software Engineer | December 2017 - Present

Technologies: Typescript, React, Redux, Material UI, Emotion, React Testing Library, Stripe

- Collaborate with Product manager, DevOps and Backend Developers to bring wireframes, designs, and user stories to life.
- Meet with the development team on a weekly basis to discuss and troubleshoot features in the previous sprint and plan for future sprints.
- Design, develop, test, implement and write documentation for new and existing features.
- Translate complex back-end functionality into user-friendly front-end interfaces for a seamless user experience.
- Develop, modify and maintain new and existing integrations.
- Investigate and resolve bugs or deficiencies in codebases.
- Execute marketing efforts including the development of the Discovery genie marketing website, landing pages, email newsletters, blogs, and social media accounts.
- Manage on-page Search Engine Optimization efforts including maintenance of website meta-tags, alt-tags, headers, and copy.
- Reduce customer support effort and time by building Support Genie, a support platform for monitoring and managing Discovery Genie user activity, accounts, and settings.

gooWee

Co-Owner, Front-End Software Engineer | October 2016 - January 2022

Technologies: JQuery, React, Redux, Bootstrap, SASS, Styled Components, Wordpress

- Managed all aspects of business operations including marketing, sales, accounting, vendor and client agreements.
- Interfaced and effectively built rapport with clients.
- Created and effectively arranged graphics, images and all other content into creative, cohesive, functional, and visually-pleasing websites and apps.
- Ensured the technical feasibility and the use of best practices in UI/UX designs.
- Built responsive websites and apps from the ground up using UI Development technologies such as HTML, CSS, Javascript, and libraries including jQuery and React.
- Built reusable code and libraries for future use.
- Participated in an agile environment for solution design, development, deployment and production support of publicly facing apps and websites.
- Identified vendor and freelancer support and managed those relationships as needed.
- Managed project timelines, scope, budget, and resources using software including Jira, Toggl, Github, and Postman.
- Research and learned new technologies and solutions
